GERMANS URGE U-BOAT WARFARE

On the contrary, reports from all sections of the country indicate that the agitation is continuing with undiminished vigor. SCIENCE COMES TO ORDET'S AID

Physician Says Girl Had Suicidal Tendency; Chemist Testifies on Spots.

Waukegan, Ill., July 6.—Answering a long hypothetical question, Dr. W. O. Krohn, physician and alienist, witness today in the trial of Will H. Orpet, charged with the murder of Marian Lambert, said Miss Lambert was of the hysterical type and had a tendency towards suicide. Hysteria, of which the defense contends Marian was a victim, is a distinct disease of the imagination, the witness said.

Dr. W. G. McNally, expert chemist who made an analysis on the stomach content of the body of Marian and examined also the spots on Marian's coat, took the stand for the defense this afternoon. Indirectly he stated the cyanide of potassium on the coat was put there four days after Marian's death on February 3.

He said the odor of cyanide disappears in a few days and cannot be chemically detected after two weeks. That on the coat, he said, he could smell the odor of cyanide on June 13, five months after the death of Marian.

"My experiments show that the spots could not possibly have been there over eight weeks," the witness declared.
